## BASIC-ABSTRACT:

NOVELTY - Involves a user logging on to a management site e.g. a learning management system and being authenticated by the site. The user then requests access to information which is hosted at an information site. The user is automatically logged on to the information site with authenticated access to the information..

DETAILED DESCRIPTION - A direct communication between the user and the information site, and also between the management and information sites is established. Management information, including user authentication data provided by the management site, and data relating to the user's activities on the information site is exchanged between the management site and the information site. INDEPENDENT CLAIMS are included for a data processing apparatus and computer software.

USE - To provide a user with controlled access to a site hosting information, e.g. an e-Learning content provider.

ADVANTAGE - Users are not limited by time or location. Enables content provider to increase numbers of users as well as prepare a variety of e.g. educational contents.

DESCRIPTION OF DRAWING(S) - The drawing shows a block diagram of the system used to implement the method.

CHOSEN-DRAWING: Dwg.2/14
